ANJOLA BALOGUN

Dallas, TX | anjola.balogun@yahoo.co.uk | linkedin.com/in/anjola-balogun-mba-474954184

SUMMARY

Finance and analytics professional with an MBA in Business Analytics, a B.Sc. in Economics, and hands-on experience in accounts payable, reconciliations, and internal audit support. Skilled in Excel, SQL, and QuickBooks, with a focus on accuracy, process improvement, and clear financial reporting.

EXPERIENCE

Audit Assistant *September 2025 – August 2026*

Nigerian Maritime Administration and Safety Agency *Lagos, Nigeria*

- Maintained financial and operational records supporting internal audit and control activities across departments.
- Prepared working papers and compliance documentation, coordinating cross-departmental document requests to support accurate reporting.
- Handled confidential financial and operational records securely, in line with organizational procedures.

Accounts Payable & Financial Analysis Specialist *March 2024 – August 2025*

Bethesda Inc. *Lewisville, TX*

- Processed and reviewed high monthly volumes of vendor invoices in QuickBooks and Excel, maintaining full compliance with payment procedures.
- Performed data-driven reconciliations, investigating and resolving discrepancies that reduced outstanding liabilities.
- Optimized payment scheduling, reducing late payment penalties.
- Designed and implemented an automated data entry workflow that shortened invoice processing time.
- Partnered with procurement and finance teams to analyze vendor transactions and recommend process improvements that increased cross-departmental efficiency.

EDUCATION

Texas A&M University – Commerce *Commerce, TX*

Master of Business Administration (MBA), Business Analytics — May 2026

University of Texas at Arlington *Arlington, TX*

Bachelor of Science in Economics, Minor in Business Administration — December 2023

PROJECTS

Invoice Audit Lab | *Python, JavaScript*

- Built a Python script and an interactive web demo that test a 47-invoice synthetic ledger for exact duplicates, possible duplicates, amounts just under an approval limit and late payments.
- Made the thresholds adjustable (matching window, approval limit, grace period) to show how flags change, treating each flag as a lead for review rather than proof of error.

Sales & Profitability Analysis | *SQL, Excel*

- Analyzed sales data in SQL and Excel to compare profit margins by category, sub-category and discount level.
- Found that Furniture earned a 6.98% margin against about 14% for Office Supplies and Technology, and that Furniture lost money at discounts of 30% or more; recommended reviewing how those discounts are approved.

Financial Forecasting & Budgeting Model | *Excel, Tableau* | *In progress*

- Building a forecasting and budgeting model from historical financial data to analyze revenue and expense trends, with Tableau dashboards for scenario analysis.
- Applying variance analysis to compare projected and historical financial performance.

CERTIFICATIONS

- Google Data Analytics Professional Certificate, Coursera
- Introduction to Data Engineering, Coursera
